This hands-on experience will immerse you in real-time cybersecurity challenges, teaching you how professional pentests are conducted. You'll learn the intricacies of **report writing, client communication, and industry best practices**. Upon completion, you'll receive an **experience letter**, validating your practical skills and boosting your career prospects in the cybersecurity field.

**3 MONTHS LEARNING**

**GUIDED LEARNING WITH FEEDBACK AND DOUBT CLEARANCE**

**ACCESS TO ALL LABS WITH SUBSCRIPTIONS**

**3 MONTHS WORKING ON LIVE PENTEST PROJECTS**

**LEARN PROFESSIONAL REPORT WRITING**

**EXPERIENCE LETTER UPON COMPLETION**

# CURRICULUM OVERVIEW

Our comprehensive curriculum is designed to transform you into a skilled cybersecurity professional. Through a carefully structured program, you'll dive deep into the most critical areas of modern cybersecurity, gaining hands-on experience with real-world challenges.

## Throughout the program:

### [ N.B: PREMIUM TIER FEATURES ]

- Weekly hands-on labs and CTF challenges
- Access to cutting-edge cybersecurity tools
- Regular assessments to track progress
- Mentoring sessions

### Web Application & API Security

OWASP Top 10  
Web attack techniques  
API security  
Secure coding

### Network Penetration Testing

Network mapping  
Exploitation  
Post-exploitation

### Cloud Security

AWS fundamentals  
Cloud vulnerabilities

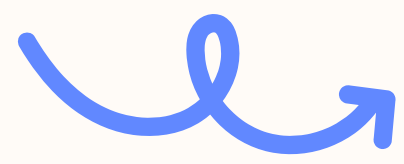

### Real-Time Projects

Client environments  
Real-world scenarios  
Security reports

# WHY YOU SHOULD ENROLL

SecurityLit offers a unique blend of theoretical knowledge and practical application, setting you up for success in the dynamic field of cybersecurity. Our program is designed to give you the skills, experience, and confidence needed to excel in today's competitive job market.

**Real-World Experience**

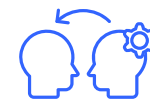

**Cutting-Edge Skills**

**Industry-Relevant Curriculum**

**Self-Paced Learning**

**Mentorship**

**Career Advancement**

Program**

**Get added to the training  
program's premium tier**

# PROGRAM FEES FOR PREMIUM TIER

Investing in your cybersecurity future with SecurityLit means joining an elite group of professionals. Our program offers top-notch training with a transparent, one-time payment structure. With a maximum batch size of just 10 students, you're guaranteed personalized attention and an intensive learning experience.

**READY TO INVEST IN  
YOUR FUTURE ?**

**ENROLL NOW**

**Total Program Cost**

**\$ 4000 NZD**

**(One Time Payment)**

**Maximum batch size**

**10**

**(Secure your spot early !)**

# AFTER COMPLETING THE TRAINING YOU WILL BE:

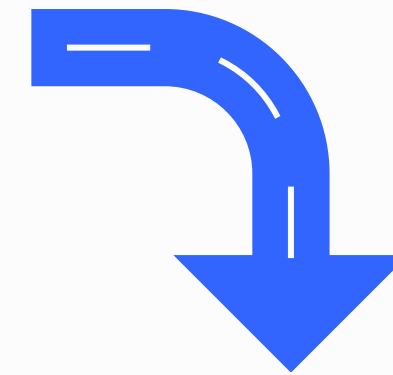

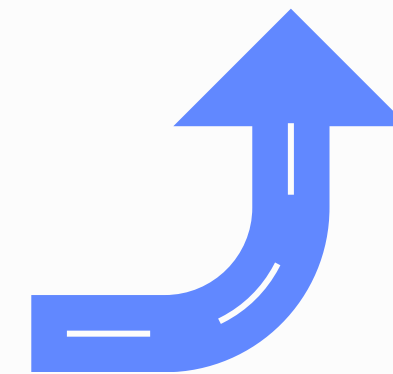

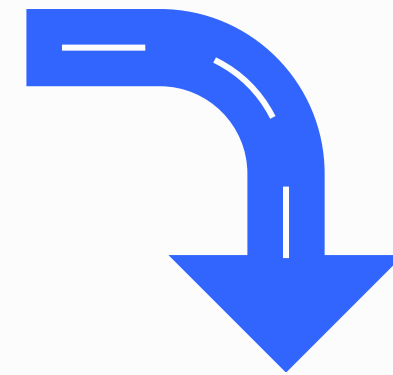

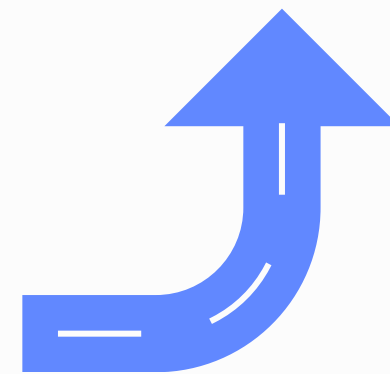

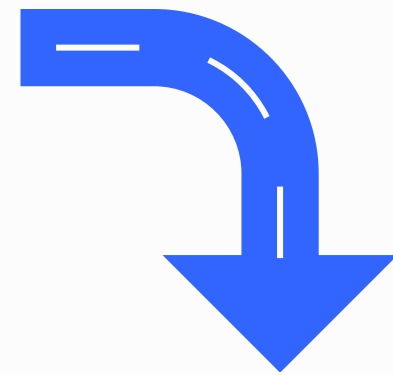

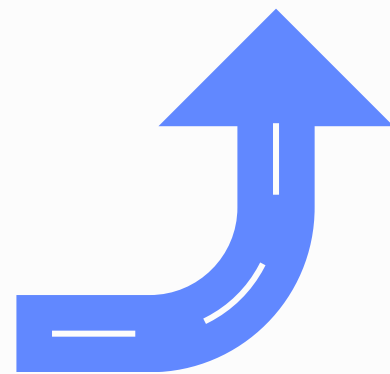

Experienced in real-world penetration testing

Proficient in web application and API security

Skilled in network security assessment

Adept at writing professional security reports

Prepared for high-demand cybersecurity roles

Confident in tackling complex security challenges

# TESTIMONIALS

## HOW SECURITYLIT TRANSFORMED CAREERS

### Keziah Achshah Guha

SecurityLit helped me change my perspective towards Security within IT. Having had the opportunity to identify potential risks and challenges with organizations, I feel I can deliver more with my current role with my new job. I feel I am a polished version of myself post my internship. The excellent work environment and knowledgeable colleagues are an asset here at Security Lit.

-Information Security Analyst at DataTorque Ltd

### Anindya Roy

The training has significantly boosted my expertise and confidence, helping me excel in my current role as a pentester. The hands-on real world projects were the most valuable aspects. I gained deeper proficiency in web security assessments and advanced exploitation techniques, which I now apply regularly. Also my communication skills are much improved.

-Associate Penetration Tester at SecurityLit

### Krishna Dinkar Biradar

This training has significantly improved my approach to penetration testing. I follow a specific process, document findings, and work as part of a team, which has enhanced my reporting skills. The teamwork aspect was the most valuable. Collaborating with others to execute pentests and learning how teams organize and prioritize tasks was eye-opening. I also found the structured process of pentesting highly beneficial compared to the more ad-hoc approach in bug hunting

-Associate Penetration Tester at SecurityLit

### Rini Sebastian

I believe I got the job because of the training and support I have got from Ankita and the Security Lit team which helped me to perform well in the interviews. So, thank you very much for all the guidance and the support you have given me. Also, for the awesome feedback, you have provided for me which helped me get into the role.

-Information Security Analyst at AIA NZ
